

- Js_i = Start-time of job i
- Je_i = End-time of job i
- p_i = Period between job i and job i+1
- rt_{v_i} = Real-time-violation from job i
- k = Count of jobs
- = Real-time-job
- = Non-real-time-job
- = Real-time-violation

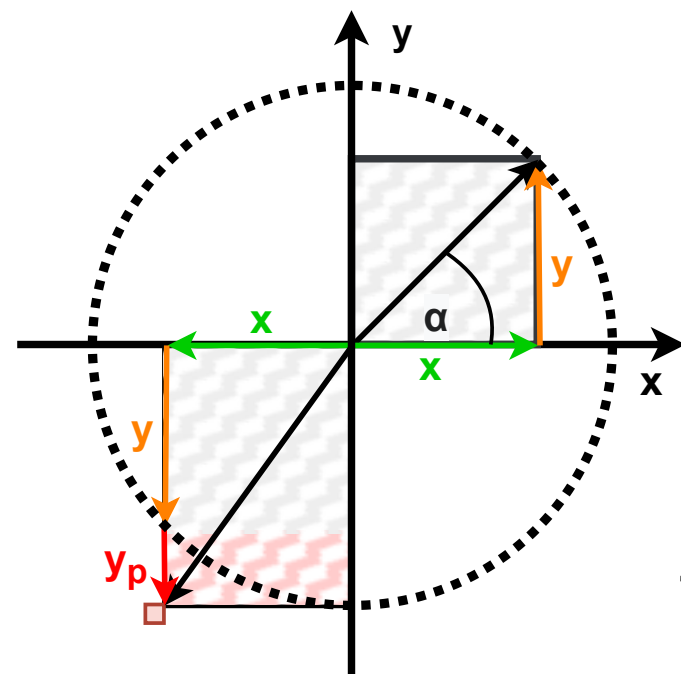

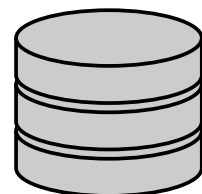

Application Concept

Calculation

$$\sum_{i=0}^k \alpha, x_i, y_i, y_{pi}$$

■ Point after real-time-penalty

Visualization
