

- $Js_i$  = Start-time of job i
- $Je_i$  = End-time of job i
- $Jd_i$  = Deadline of job i
- $p_i$  = Period between job i and job i+1
- $rtv_i$  = Real-time-violation from job i
- $k$  = Count of jobs
- = Real-time-job
- = Non-real-time-job
- = Real-time-violation

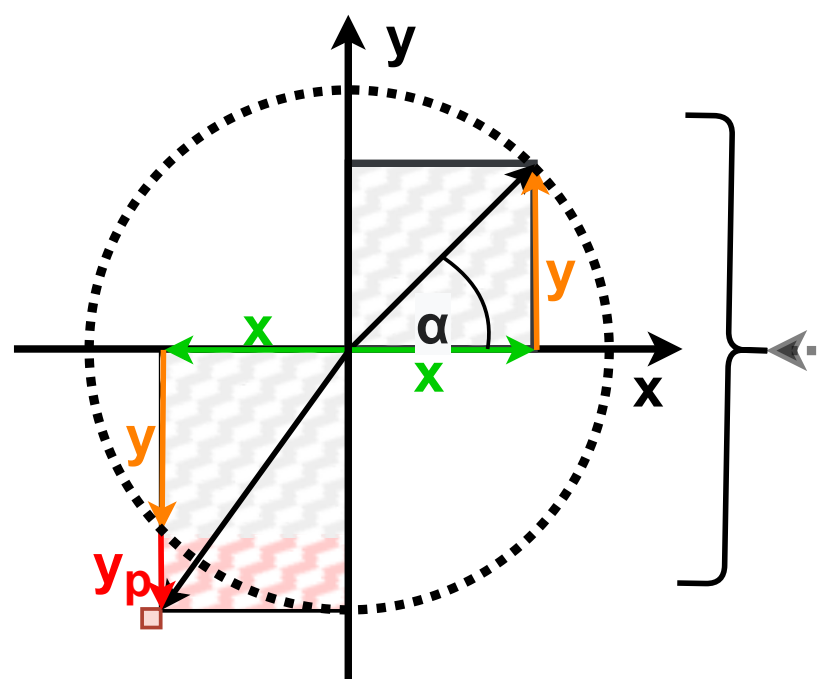

## Application Concept

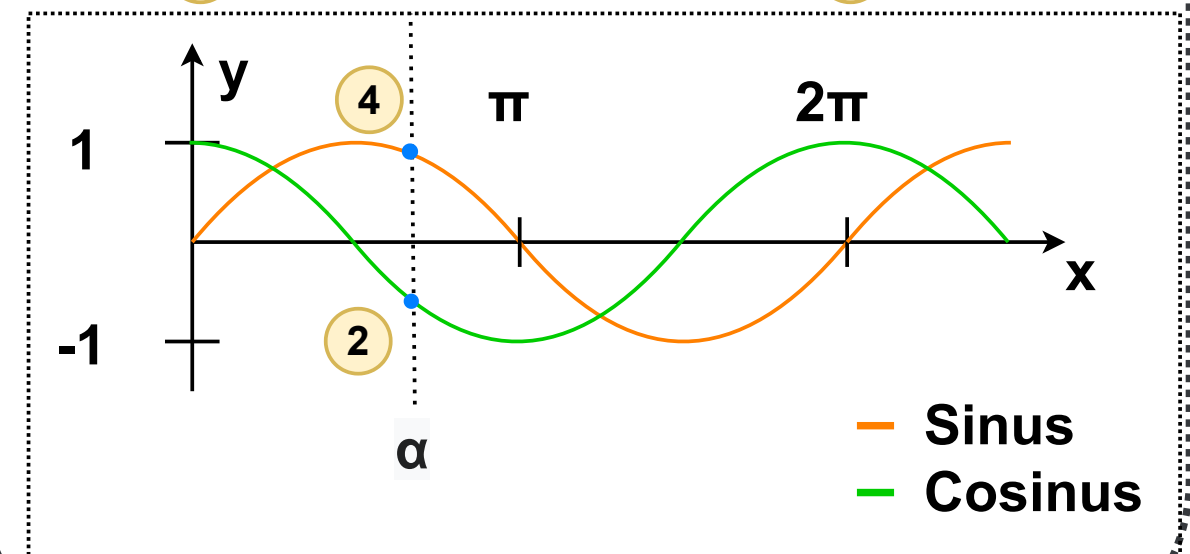

## Calculation

$$\sum_{i=0}^k \alpha, x_i, y_i, y_{pi}$$

■ Point after real-time-penalty

## Visualization
